Mr David Bain
Service Manager
Aston Air

LETTER OF REFERENCE

Hello David

I would like to personally express my appreciation for the outstanding support of Aston as a company and to yourself as Service Manager and Chris Neuendorf in Projects.

The industrial vandalism and destruction of our large AC Plant at our Eight Mile Plains building last week has left us without air conditioning right at the commencement of the Brisbane summer. Understanding this predicament, you both very quickly prioritised our need, visited site and to assist our insurance risk process submitted a tender within 3 days with the aim to effect a complete system reinstall before Christmas. Without this support the rapidly approaching festive season would have pushed the project completion to the middle of February 2021. This is an example of outstanding service, a quality in which Aston is well credentialled.

I support 23 of 770 Church owned buildings across our Pacific Area. Aston has successfully completed three construction projects in recent years being Upper Coomera (Nov 2016), Augustine Heights (Nov 2016 pictured above) and Toowoomba (2019). I have had very little trouble with the AC plant during the defect period and have found Service Technicians to be both professional and helpful. I have no hesitation recommending Aston Air and would be happy to be a reference for potential clients.

Yours sincerely

Daniel Hardman
